Contents of Volume 14, 1984

Issue No. 1: Spring

On the NP-Completeness of Certain Network Testing Problems
S. Even, O. Goldreich, S. Moran, and P. Tong 1

Computational Study of an Improved Shortest Path Algorithm
F. Glover, R. Glover, and D. Klingman 25

On the Computational Complexity of the Minimum-Dummy-Activities Problem in a PERT Network
M. M. Sysło 37

Graphs with the Smallest Number of Minimum Cut Sets
D. Smith 47

An Algorithm for Construction of a k-Connected Graph with Minimum Number of Edges and Quasiminimal Diameter
U. Schumacher 63

A Special Spatial Equilibrium Problem
J-S. Pang and C-S. Yu 75

On-Line Connectivity Algorithms
G. A. Cheston 83

Algorithms for Finding Paths with Multiple Constraints
J. M. Jaffe 95

A Generalized Network Flow Model with Application to Power Supply-Demand Problems
C-C. Liu and F. F. Wu 117

Vulnerability of Communication Networks
L. Caccetta 141

An Algorithm for the Steiner Problem in Graphs
J. E. Beasley 147

Two Exact Algorithms for the Distance-Constrained Vehicle Routing Problem
G. Laporte, M. Desrochers, and Y. Nobert 161

Book Reviews 173

Issue No. 2: Summer

On Minimal-Node-Cost Planar Embeddings
J. A. Storer 181
Synthesis of Directed Multicommodity Flow Networks
A. Itai and D. K. Pradhan 213
On Multicommodity Flows in Planar Graphs
R. Hassin 225
The Period Routing Problem
N. Christofides and J. E. Beasley 237
Shortest-Path Methods: Complexity, Interrelations and New Propositions
S. Pallottino 257
Sorting Algorithms for the Implementation of a Generalized Vector Product
A. Garcia-Diaz, D. K. Friesen, and D. J. Bagert 269
Shortest-Path Algorithms: Taxonomy and Annotation
N. Deo and C-Y. Pang 275
A Quick Method for Finding Shortest Pairs of Disjoint Paths
J. W. Suurballe and R. E. Tarjan 325
An Extremal Problem on the Connectivity of Graphs
Q-M. He 337
On Computing the Connectivities of Graphs and Digraphs
A. H. Esfahanian and S. L. Hakimi 355

Issue No. 3: Fall

Independent Sets in Random Sparse Graphs
P. G. Gazmuri 367
Updating Routing Tables after Resource Failure in a Distributed Computer Network
M. J. Johnson 379
Euclidean Shortest Paths in the Presence of Rectilinear Barriers
D. T. Lee and F. P. Preparata 393
The Amount of Overtaking in a Network of Queues
W. Whitt 411
Linearized Simplicial Decomposition Methods for Computing Traffic Equilibria on Networks
J-S. Pang and C-S. Yu 427

Bounds on Expected Performance of Networks with Links Subject to Failure
M. Carey and C. Hendrickson 439

Optimal Dynamic Routing in Communication Networks with Continuous Traffic
B. Hajek and R. G. Ogier 457

Issue No. 4: Winter

Network Reliability and Acyclic Orientations
R. Johnson 489

The Even-Path Problem for Graphs and Digraphs
A. S. LaPaugh and C. H. Papadimitriou 507

Lagrangian Dual Coordinatewise Maximization Algorithm for Network Transportation Problems with Quadratic Costs
A. Ohuchi and I. Kaji 515

Heuristics for Finding a Maximum Number of Disjoint Bounded Paths
D. Ronen and Y. Perl 531

Routing with Time Windows by Column Generation
J. Desrosiers, F. Soumis, M. Desrochers, and Gerard 545

Note on Independence of Arcs in Antiparallel for Network Flow Problems
J. N. Hagstrom 567

Hierarchical Vehicle Routing Problems
A. Marchetti Spaccamela, A. H. G. Rinnooy Kan, and L. Stougie 571

On the Practical Importance of Asymptotic Optimality in Certain Heuristic Algorithms
H. N. Psaraftis 587
